

TRUTH, TRUST + TRENDS IN THE AGE OF GENERATIVE A.I.

Drew Hemler, MSc, RD, CDN, FAND

November 18th at 5:00pm

Bulger Communication Center 423

reception to follow

Buffalo State University alumnus and nationally recognized speaker brings a unique perspective on how Generative AI (GenAI) is shaping public health, learning, and decision-making. Known for blending evidence, ethics, and humor, Drew helps audiences gain clarity and confidence when navigating technology's role in modern life

Learning Objectives

1. Describe how generative AI is influencing the consumer behaviors, public health, and learning environments.
2. Analyze the challenges of misinformation, online credibility, and digital identity in AI-mediated spaces.
3. Apply practical frameworks and strategies to verify information, build trust, and use AI responsibly in professional and personal contexts. (1 CPEU applied for)
